Summary:

India's aviation market expanding India, now the third-largest domestic aviation market globally, recorded a robust 15% year-on-year increase in air passenger traffic, handling 376 million passengers in FY24, according to a report by aviation advisory firm CAPA India. This growth highlights the resilience and expansion of the aviation sector despite challenges faced by several carriers in recent years. In the current financial year, domestic air traffic is projected to rise by 6-8%, reaching between 161 and 164 million passengers, while international traffic is expected to jump by 9-11% to between 75 and 78 million passengers by March 2025. India's domestic aviation penetration stands at just 10%, suggesting ample room for growth. To further boost connectivity, the government plans to extend its flagship Udega Desh ka Aam Nagrik (UDAAN) program for an additional 10 years, adding hundreds of new airports to the country's network. Despite this expansion, the Indian aviation market has seen several high- profile bankruptcies over the last decade, with Kingfisher Airlines, Jet Airways, and Go First all ceasing operations. These cases underscore the challenges airlines face, from high debt burdens and fluctuating fuel prices to aircraft leasing costs and capacity limitations.

SCALE COUNTS

Date: 23-12-2025, Publication: The Times of India, Journalist / Agency: , Edition: Bangalore, Supplement: Bangalore Times, Page No:

Summary:

SCALE COUNTS Lower fees expected to boost business even as assets under mgmt rise: Shah MF Margins to Face Pressure; Vol to Compensate: ICICI Pru AMC Prashant Mahesh Mumbai: Mutual fund profitability could come under pressure with the size of assets under management growing, but a fall in unitholders' fe- es could compensate for this squee- ze, said Nimesh Shah, MD and CEO of ICICI Prudential Asset Manage- ment Company, whose 10,600 crore Initial Public Offer (IPO) is open for subscription. The issue, which will close on December 16 (Tuesday), was subscribed 2.11 times on Monday-- the second day of the offer. "As the size of the fund grows, mar gins are coming down, but with TER (total expense ratio) coming down, volumes will grow, and volumes will compensate for margins," said Shah in an interview "Lower charges will increase the probability of beating the index and will make your business more sustainable." According to Shah, the most impor tant financial parameter is operating profit. "Valuation in this industry is best viewed through the lens of opera- ting profit growth," he said. "We have diversified across mutual funds, port folio management services, alternati- ve investment funds and offshore advi As the size of the fund grows, margins are coming down, but with TER (total expense ratio) com- ing down, volumes will grow, and volumes will compensate for margins NIMESH SHAH MD and CEO, ICICI Prudential AMC sory, each with a different margin pro- file. The finalmargin is a mix of these." ICICI Prudential AMC, the country's second mutual fund with assets under management of 10.87 lakh crore, is the sixth in the 50-member strong in- dustry to tap the IPO market. HDFC Mutual, Aditya Birla AMC,

UTI, Nip- pon and Canara Robeco are among the fund houses that have made their stock market debut in recent years The IPO values ICICI Prudential at 1.07 lakh crore. The market cap of HDFC Mutual Fund, the third largest with AUM of 8.8 lakh crore, stood at 1.11 lakh crore "Over the past several years, asset management businesses have grown at healthy rates while requiring mini- mal incremental capital," said Shah. "Businesses that deliver consistent growth without heavy capital deploy ment tend to command higher valuation multiples." Prudential Corporation Holdings, the joint venture partner in the com- pany will offload up to 14.41% of ICICI Prudential AMC's equity Since the issue is entirely an offer for sale (OFS) by Prudential, the company will not receive any proceeds from the IPO. Shah said Prudential's decision to sell a stake in the AMC in the IPO has come after remaining invested in the business since 1998. "They are monetising a part of their investment after 27 years and are sel- ling only a portion," he said. ICICI Bank will continue to be the majority shareholder of the firm with a 53% stake in the joint venture, said Shah. BUSINESS STRATEGY ICICI Prudential's focus on hybrid products has made it one of the big- gest asset managers in the category Its market share in the hybrid cate- gory is around 25% compared to 13.6% in equity assets and 13.6% ove rall. "Our strength in hybrid and as- set allocation-oriented strategies. has been built over multiple market cycles by focusing on risk-adjusted returns," said Shah. It is also sharpening its focus on the alternative investment business in- cluding equity-focused Portfolio Ma- nagement Services (PMS), Alternati- ve Investment Funds (AIFs), private credit, and office yield funds. Shah said between FY23 and FY25, al- ternative AUM has registered a com- pounded annual growth rate of 43.3%. Currently mutual funds account for 93% of its assets while alternatives ac- count for the balance 7%.

Maruti WagonR CNG: India’s Top-Selling Compact CNG Car – Price, EMI, Features & Specifications

Date: 22-08-2024, Publication: Millennium Post, Journalist / Agency: , Edition: Kolkata, Supplement: Inland, Page No:

Summary:

Following this, the Consortium of Murari Lal Jalan and Florian Fritsch withdrew the appeal. "Until the shares of the corporate debtor (Jet Airways) are not issued to the successful resolution applicant (consortium), pass necessary directions requiring the MC (monitoring committee) lenders to transfer the sum of Rs 200 crore infused by SR (successful resolution applicant), in the share application account to an interest bearing escrow account," JKC had said in its plea before the NCLAT. The tribunal asked the JKC either to withdraw its plea or face dismissal, on which the consortium preferred to withdraw it. Jet Airways stopped flying in April 2019, and later the consortium emerged as the winning bidder under the insolvency resolution process. However, ownership transfer has been hanging fire amid continuing differences between lenders and consortiums.Earlier this year on March 12, the NCLAT has upheld the resolution plan of grounded carrier Jet Airways and approved the transfer of its ownership to the JKC. It was directed to pay Rs 350 crore for initiating the process of transfer. However, it paid only Rs 200 crore in cash and asked the lenders to adjust Rs 150 crore from the performance bank guarantee submitted by it. This was opposed by the lenders. however, NCLAT directed that this be adjusted. Again this was challenged before the SC by the MC and others, which set aside the NCLAT order and directed the JKC to deposit the money. Lobster Dining Car Market: Business overview, Upcoming Trends and Top Company Analysis Forecast - 2031

Date: 21-08-2024, Publication: knnindia.co.in, Journalist / Agency: , Edition: Internet, Supplement: test 2, Page No:

Summary:

The global lobster dining car market is expected to grow at a significant CAGR during the forecast period (2024-2031). The major factors propelling the growth of the global lobster dining car market include the rising awareness about the benefits of seafood and ready-to-eat food. Lobsters are rich in Copper, phosphorus, zinc, omega-3 fatty acids, magnesium, and vitamins E and B12. Lobster intake has been shown to decrease inflammation, increase energy, and enhance cognition. Get Free Sample link @ https://www.omrglobal.com/request-sample/lobster-dining-car-market In addition to this, the growing pescetarianism preferring population over non-vegetarian food will drive the growth of the market. Pescetarianism is a vegetarian diet that includes seafood however, excludes meats such as beef, pork, chicken, and other meats. Consumers' choice for a healthy diet is causing this transition that is further driving the market. The key players contributing to the growth of the global lobster dining car market by adopting various strategies such as product launches & developments, mergers and acquisitions, partnerships, and agreements, include Cousins Maine Lobster, Luke, Aos Lobster, Bite into Maine, Freshies Lobster, among others. For instance, in July 2019, Luke's lobster announced to launch its first biggest full-service restaurant in Poland.

Summary:

Tata Motors, India's largest commercial vehicle manufacturer and mobility solutions provider, showcased a comprehensive range of advanced aggregates at Bauma Conexpo 2024. The exhibits include CPCB IV+ compliant Tata Motors Gensets available from 25kVA to 125kVA power range, CEV BS V emission-compliant industrial engines from 55-138hp power nodes, live axles, and trailer axles and components. The solutions are designed to address to meet the evolving needs of material handling, construction equipment, industrial applications and logistics segments, and are engineered for high efficiency and durability. Inaugurating Tata Motors pavilion at Bauma Conexpo 2024, Mr. Vikram Agrawal, Head - Spares and Non-Vehicular Business, Tata Motors Commercial Vehicles, said, "Bauma Conexpo is the perfect platform to introduce Tata Motors aggregates for customers seeking robust and reliable technologies. These new aggregates are the direct voice of our customers, developed through extensive customer feedback. We are expanding our portfolio to address India's evolving needs - delivering power solutions with gensets, enabling infrastructure with CEV BS V emission-compliant industrial engines and live axles, and strengthening logistics with trailer axles and components." Tata Motors aggregates are distinguished by their high durability, efficiency and performance. Developed through extensive research and manufactured in state- of-the-art facilities, these solutions are backed by over 2500 authorised service outlets across the country. The company remains committed to supporting India's infrastructure growth by providing innovative, high-performance aggregates that meet stringent industrial specifications. Tata Motors aggregates at Bauma Conexpo 2024 • Tata Motors Gensets: CPCB IV+ compliant with Remote Monitoring System; 25KVA to 125kVA power range • Industrial Engines: CEV BS V emission-compliant; available in 55-138hp power nodes. • Live Axles: Robustly designed for high-tonnage construction equipment • Trailer Axles and Components: New 16mm thick trailer axle beam for heavy-duty commercial vehicles

Barred by delay and laches’; Delhi High Court dismisses petition challenging tender award passed by Indian Oil Corporation

Date: 17-12-2024, Publication: eonline.com, Journalist / Agency: , Edition: Internet, Supplement: , Page No:

Summary:

Barred by delay and laches’; Delhi High Court dismisses petition challenging tender award passed by Indian Oil Corporation The Delhi High Court said that the issuance of a commitment letter does not make the issuer a ‘bidder’ in the tender process. Published on June 26, 2024By Editor_4 Advertisement   Delhi High Court: In a petition filed under Article 226 of the Constitution for the cancellation of the Award of tender awarded by Indian Oil Corporation Limited (‘Indian Oil’) (Respondent 1) to Commtel Networks Pvt. Ltd. (Respondent 2) among other prayers, the Division Bench of Manmohan, ACJ.* and Manmeet Pritam Singh Arora, J. held that the petition was barred by delay and laches while reiterating that a party which has not participated in a tender process does not have any locus to challenge the award of the tender. Background The petitioner was a registered company engaged in the business of manufacturing and marketing of telecommunication and networking equipment. He was stated to be one of the only two Indian Original Equipment Manufacturers (‘OEM’) of Synchronous Digital Hierarchy (‘SDH’) equipment. Through the present petition, the petitioner sought the cancellation of the award of tender awarded by Indian Oil to Commtel Networks and a direction to Indian Oil to take action against Commtel Networks and Respondent 3 for the violation of Clause 5.1.6 of the tender. The petitioner, through this petition, also sought directions to Indian Oil for strictly adhering to the prescribed procedures for bidding and awarding contracts as delineated in the terms of the tender and for deciding the complaint filed by the petitioner on 23-10-2023 in a time-bound manner. Indian Oil issued a tender dated 16-02-2023 for developing an oil pipeline project in Gujarat, Rajasthan, and Haryana. After respondent 4 submitted its bid on 05-05-2023, it requested the petitioner to issue a commitment certificate during the evaluation of the technical bid for onward submission to Indian Oil. Even though respondent 4 qualified in the technical bid, it was rejected in the financial bid and the tender was awarded to Commtel Networks. It was stated that the facts evidenced that if Respondent 4 had been successful, the petitioner would have been the direct beneficiary of the tender award. Upon review of the tender summary report, the petitioner learned that Commtel Networks was the distributor of respondent 3 and that they were directly related to each other. The petitioner stated that both the respondents could not have simultaneously submitted separate bids for the tender since it negated clause 5.1.6 of the tender which stipulated that if two bidders have a conflict of interest, which substantially affects the fair competition, the said bidder shall not be eligible to bid for the tender. The petitioner made a representation to Indian Oil on 23-10-2023 and even though the vigilance department sought details of the alleged contravention, nothing concrete was being done which is why the present petition was filed by the petitioner. Analysis and Decision The Court noted that the first question to be decided in the dispute was whether the petitioner could maintain independent proceedings against Indian Oil for impugning the tender award in favour of Commtel Networks. The Court answered this negatively while relying upon NHAI v. Gwalior-Jhansi Expressway Ltd., 2018 (8) SCC 243. The Court stated that the petitioner did not participate in the bidding process and elected to remain outside the said process, and the fact that the petitioner was the intended supplier of SDH equipment of respondent 4 would not give any locus to the petitioner to challenge the tender process or to maintain the proceedings. Further, the Court stated that the issuance of a commitment letter by the petitioner to respondent 4 would not make it a ‘bidder’ in the tender process. The Court also stated that given the decision by the Supreme Court, it was clear that a party that had not participated in a tender process did not have any locus to challenge the tender award and could not be heard to make any grievances since the party did not acquire any right in the tender. The Court stated that the petitioner was aware that respondent 4 stood disqualified in September 2023 and that the tender was to be awarded to Commtel Networks which is why the present petition was barred by delay and laches. Thus, the Court found the petition to be without merit and dismissed the same accordingly. [Primatel Fibcom Ltd. v. Indian Oil Corporation Ltd., 2024 SCC OnLine Del 4278, Decided on 01-06-2024]

Large-cap lenders vs mid-cap banks: Which ones should you pick for long term?

Date: 27-12-2024, Publication: livemint.com, Journalist / Agency: , Edition: Internet, Supplement: , Page No:

Summary:

Large-cap lenders vs mid-cap banks: Which ones should you pick for long term? As investors weigh their options in the banking sector, the choice between blue-chip lenders and mid-cap ones has become a pivotal decision. Pranati Deva Published19 Jul 2024, 06:36 PM IST Large-cap lenders vs mid-cap banks: Which ones should you pick for long term? Although the banking sector has lagged behind the Indian benchmark Nifty index over the past 6 to 12 months, it is well-positioned for substantial long-term growth, driven by India's largely underbanked population. In 2024, the Nifty Bank index has risen over 8 percent year-to-date, trailing the benchmark Nifty's almost 13 percent increase. Meanwhile, over the past year, the Nifty Bank index has gained over 14 percent, compared to the Nifty's approximate 24 percent rise. Within the banking sector, private banks have undergone a more pronounced correction compared to their public sector counterparts. Nevertheless, analysts expect a recovery for the overall banking sector in the near future. So between blue-chip lenders and mid-cap banks, which ones should you pick for the long term?   Also Read | SBI vs HDFC Bank: Which blue-chip lender should you pick for long term? Constituents Among banking stocks, large-cap lenders have witnessed mixed returns. ICICI Bank and Axis Bank have risen 25 percent and 17.5 percent, respectively in 2024 YTD. Meanwhile, Punjab National Bank and SBI have also advanced 22 percent and 38 percent, respectively. Bank of Baroda also added over 8 percent each. However, IndusInd Bank shed over 10 percent, HDFC Bank was down 6 percent and Kotak Bank declined 5 percent in this period. Mid-cap banks have also given similar returns but delivered better performance than large-cap ones. Indian Overseas Bank is the top gainer, up almost 51 percent, followed by Punjab & Sind Bank, which rallied over 48 percent and Bank of Maharashtra, which jumped 46 percent. Federal Bank rose 23 percent and City Union Bank was up 4 percent this year so far. However, Bandhan Bank shed the most, down around 21 percent, followed by IDFC First Bank and RBL, down over 14 percent each. Blue-chip lenders or mid-cap banks? Which ones should you pick? Here's what experts say: With varying opinions from industry experts, the debate centers around stability, growth potential, and risk tolerance. This article summarises insights from key analysts to help investors make an informed decision.   Also Read | HCL Tech vs TCS: Which IT stock to buy after strong Q1 results 2024 Raj Gaikar, Research Analyst, SAMCO Securities, prefers large-cap lenders over mid-cap ones. Mid-cap lending companies are targeting underpenetrated niche segments, which are relatively riskier compared to the customer base of large-cap lenders. Given that, the market is currently overvalued and the mid-cap lender companies may face a correction, investors with low-risk tolerance should avoid investing in mid-cap lenders for now. Currently, large-cap lenders are undervalued and are likely to deliver better performance in the near future. However, investing in mid-cap lenders could help investors generate alpha over the long term. Related Stories Mamata Machinery IPO allotment date in focus. Latest GMP, step-by-step guide to check allotment status online 3 min read01:09 AM IST Stock market today: Trade setup for Nifty 50 to global markets; 5 stocks to buy or sell on Tuesday — 24 December 2024 4 min read01:04 AM IST DAM Capital Advisors IPO allotment date in focus. GMP, how to check allotment status online 2 min read01:12 AM IST Dnyanada Vaidya, Research Analyst - BFSI at Axis Securities, also likes large-cap lenders better. Private banks, we believe, are currently trading at attractive valuations due to their strong growth runway and steady performance

delivery potential. This stability leads us to prefer larger banks over their mid-sized banking peers. However, among the mid-sized banks, we like Federal Bank. Jignesh Shial, Director - Research; Head of BFSI Sector at InCred Capital, as well emphasises a preference for large-cap banks. Large-cap lenders remain our preferred pick over mid-cap lenders as we believe it to be a safer bet given the rising concerns in smaller ticket lending. Ajit Mishra - SVP, Research, Religare Broking, also advised prioritising large-cap lenders over mid-cap ones. Given the current market conditions, investors should prioritise large-cap lenders over mid-cap and small-cap lenders. The latter are trading at high valuations, presenting significant risks in the event of market corrections. Large-cap lenders, on the other hand, offer greater stability, better risk management, and are well-equipped to handle regulatory changes. Moreover, large-cap banks have a consistent history of paying dividends and returning value to shareholders, making them a more prudent investment choice. Also Read | Tata Motors vs Tata Steel: Which Tata Group stock should you prefer in long term Vaibhav Jain, Head of Content & Education, Share.Market, suggested investors to maintain a focus on large-cap lenders. Lending is a high-beta business, meaning lenders tend to perform exceptionally well during economic expansions but can suffer significant losses during downturns. For those willing to take higher risks, investing in mid-cap lenders can yield substantial returns in good times but can also lead to severe losses in bad times. Smaller lenders have higher growth potential but also face significant asset quality issues. When comparing large-cap and mid-cap lenders, it's clear that mid-cap lenders inherently have more quality issues. They deal with higher costs of funds, higher yields on loans, and consequently, higher NPAs and provisions. This is reflected in the Quality factor scores, where large-cap lenders consistently outperform their mid-cap counterparts. Investing in mid-cap lenders would only be justifiable if they had strong Sentiment and Momentum factors. However, a close examination of these scores reveals that mid-cap lenders currently lack strong momentum and sentiment. Without these supportive factors, mid-cap lenders do not present a compelling case, as they offer no significant upside potential and lack protection against downside risks should economic conditions worsen. Therefore, it is suitable for investors to maintain a focus on large-cap lenders. These institutions offer more stability, better quality, and sufficient upside potential without the excessive risks associated with mid-cap lenders. Also Read | TVS Motor vs Bajaj Auto: Which auto stock should you pick for long term? Atul Parakh - CEO, Bigul, advocates for a balanced investment approach. Investors should consider a mix based on their risk profile. Large-cap lenders are generally more stable with lower volatility, better placed to weather economic cycles, and often have stronger balance sheets. Mid-cap lenders typically offer higher growth potential, may offer better returns in bullish markets, and are often more nimble in adapting to market changes. A balanced approach might involve a core allocation to largecaps for stability, with some mid-cap exposure for growth potential. The ratio would depend on individual risk tolerance and market conditions. The choice between large-cap and mid-cap banks largely depends on individual risk tolerance and investment goals. While mid-cap banks may offer higher growth potential, they come with increased volatility. On the other hand, large-cap lenders, generally provide greater stability and consistent performance. For investors seeking safety and reliable returns, large-cap banks are the preferred option. Conversely, those willing to take on more risk for potential higher returns might consider mid-cap lenders, provided they closely monitor market conditions and the specific performance of these institutions.

Growth pace to help HDFC Bank double size every four years'

Summary:

'Growth pace to help HDFC Bank double size every four years' CEO says merged entity's capital, customer base to propel growth across diverse financial segments; lender expects to add 1,500 branches a year The Hindu Bureau MUMBAI aving completed what he called er in corporate India" bet- ween

HDFC Ltd. and HDFC Bank Ltd., Sashidhar Jag- dishan, MD & CEO of HDFC Bank said the potential of the combined entity would enable the bank to double its size every four years. "The runway for finan- cial services and mortgag- es, which are so under- served and under penetrated, is going to be very large. HDFC Bank... with a large and growing distribution and customer franchise, more than adeq- uate capital, a healthy as- set quality and profitabili- ty, will be best positioned to capture growth," Mr. Jag- dishan wrote to the bank's employees on Saturday. "The pace at which we aim to grow, we could be creating a new HDFC Bank every 4 years!," he added. He said the merger was spurred by the right tim- ing, from an 'economics' and regulatory perspec- tive. Stating that the bank would harness the bond its erstwhile parent HDFC had with its customers, Mr. Jag- dishan said the lender would now leverage the home loan products to grow its customer base. "The bank with its supe- Mega merger The combined HDFC Bank aims to leverage former mortgage lender's customer base to expand business HOME LOANS, NOW AT HDFC BANK ?With more than adequate capital, healthy asset quality and profitability, bank best positioned to rior digital platform and digital journeys will have the propensity to upsell to the home loan customer with a complete bouquet of the bank's and subsidiar- ies' products across pay, save, borrow, invest, in- sure, and trade," he added. "The opportunity to bundle our other products like a savings account for all banking needs, a perso- nal loan for upfront contri- bution to the builder, a consumer durable loan for purchase of durables for the new home, a life insu- rance to protect the family in any eventuality, a home insurance to protect against fire and structural damages, a credit card, an SIP along with EMI pay- ments to create wealth, can all be bundled and or- chestrated with a single click during this process. The bank would be ad- ding more than 1,500 branches every year for capture growth, says CEO ?HDFC Bank will allot to HDFC Ltd. shareholders 42 new shares of 1 face value for every 25 shares of *2 face value they hold ?Combined net profit as on March 31 was 60,348 crore some years and would en- hance its technology to "make us a 'technology company' which is into banking!," the CEO wrote. Share swap ratio The shares of the com- bined entity, HDFC Bank, will start trading from July 13, and shares of HDFC will be extinguished. HDFC Bank will issue and allot to eligible shareholders 42 new equity shares of the face value of 1 each for ev- ery 25 equity shares of the face value of *2 each held by such shareholder in HDFC Ltd. as on the Re- cord Date i.e., July 13. The combined net profit as on March 31 was *60,348 crore, the net worth was 4,14,184 crore while the number of em- ployees was 1,77,239. Starting early on Satur- day, the offices and branches of HDFC were re- branded as HDFC Bank.

Tata Motors Q3

Summary:

Tata Motors Q3 Profit Rises Il-fold on Strong India Show But net at *1,215 cr misses estimates on lax JLR business even as domestic strategy bears fruits Our Bureau Mumbal: Tata Motors reported anearly 11-fold increase in conso- lidated net profit for the quarter through December, led mainly by strong volumes from its Indi- an operations. But the perfor mance missed analyst estimates by half, owing to a lax quarter for the Jaguar Land Rover business. Consolidated net profit for the October-December quarter rose to 1,215 crore from about 112 cro- re a year earlier, as the company sald Its turnaround strategy here started to bear fruits and due to cost controls. Consolidated reve nue increased 14% to 74,156 crore. The turnaround strategy was implemented in August to turn around the company's passenger vehicles business as well as to strengthen Its position as the market leader in the commercial vehicles segment. Analysts tracked by Bloomberg on average were expecting Tata Motors to post a net profit of €2,500 crore. The UK-based Jaguar Land Ro ver unit, the biggest money-spin- Miles to Go Analysts were 3.5% retail sales 14% expecting co to post a growth due to China, net profit of 25k cr overseas markets carmaker's consolidated JLR posted revenue touched

<74,156 crore flat sales in a few markets like the UK, US ner for Tata Motors, posted flat sa- les In a few markets like the UK, USand mainland Europe, keeping the consolidated performance be low estimates. Its retail sales grew 3.5%, driven primarily by China and overseas markets. Investments made in new pro- ducts, technology and capacities also welghed on the margin. In the standalone Indian bust- ness, sales volume, including ex- ports, rose 31% to 172,952 units in the past quarter, with significant growth across the entire portfo- lio. In passenger vehicles, for long a drag on the overall bust ness, India sales rose 22%. 31% Standalone Indian business, sales volume, Including exports, touched 172,952 units In the past quarter "The turnaround strategy is de Ilvering results for us as is evi- dent in share gain in an intensely competitive market and impro ved profitability enabled by a slew of new product launches and customer-centric incentives," managing director Guenter But schek said in a news release. Jaguar Land Rover, meanwhile, is expecting an improved perfor mance in the ongoing quarter. JLR will soon be launching its first electric car and expects a "stronger all-round performan- ce in the fourth quarter, driven by new models, seasonality and improved profitability," said Ralph Speth, the UK-based unit's chief executive. Consolidated finance costs on a consolidated level rose to 1,247 crore from 377 crore a year earli- er due to increased borrowings In both in India and at JLR. The com- pany's consolidated net debt stood at 47,777 crore primarily due to higher investments in JLR. Maruti Suzuki cars to be cheaper? Company ‘adjusts’ production, reduces dealer stock ahead of Diwali

Date: 21-08-2024, Publication: knnindia.co.in, Journalist / Agency: , Edition: Internet, Supplement: test 2, Page No:

Summary:

“We are currently adjusting production to reduce market stock and are closely monitoring demand trends. India will be in a critical period with the upcoming festival season; so we will closely monitor demand trends,” SMC told analysts in a conference call reported by Business Standard. Read more: QVC Exports IPO opens for subscription: Price band at ?86 per share, check key details of SME issue Maruti Suzuki’s production increased 7.4 per cent year-on-year to 496,000 units in the first quarter of 2024-25. During the same period, sales were up only 1.2 per cent ar 427,000 units. Concerns have been raised over slowdown in car sales across the Indian auto industry which has resulted in dealer stockpiles reaching alarming levels. The Federation of Automobile Dealers Associations (Fada) has written two letters to the Society of Indian Automobile Manufacturers (Siam) in the past few months warning about the same.

Ford and Mazda issue "Do Not Drive" alerts for 457,000 cars

Date: 21-08-2024, Publication: knnindia.co.in, Journalist / Agency: , Edition: Internet, Supplement: aaa, Page No:

Summary:

Ford Motor Co. and Mazda North American Operations Tuesday issued "Do Not Drive" advisories for owners of certain vehicles who have not yet had their cars fixed after several Takata-airbag recalls. The two automakers are urging customers of recalled vehicles equipped with non-desiccated Takata air bags to stop driving the cars immediately and get their faulty airbags repaired or replaced, according to a notice posted by the National Highway Traffic Safety Administration. "If you have one of these vehicles, do not drive it until the repair is completed and the defective air bag is replaced," the NHTSA said. The Ford advisory comes after three previously announced recalls (15S21, 17S42, and 19S01) beginning in 2015, involving several vehicle lines equipped with Takata non-desiccated airbag inflators. "The age of these vehicles makes it increasingly possible that a part inside the airbag will explode and expel sharp metal fragments during a crash. This could cause serious injury or death to the driver or passengers," the automaker said in its advisory notice. Ford's warning covers 374,290 of the following model year 2004-2014 vehicles previously recalled: 2004-2006 Ford Ranger trucks 2005-2014 Ford Mustang vehicles 2005-2006 Ford GT vehicles 2006-2012 Ford Fusion, Mercury Milan, Lincoln MKZ / Zephyr vehicles 2007-2010 Ford Edge and Lincoln MKX vehicles 2007-2011 Ford Ranger trucks Mazda's warning covers 82,893 of the following model year 2003-2015 vehicles previously recalled: 2004 – 2009 B-Series 2003 – 2013 Mazda6 2006 – 2007 MazdaSpeed6 2004 – 2006 MPV 2004 – 2011 RX-8 2007 – 2012 CX-7 2007 – 2015 CX-9

Lobster Dining Car Market: Business overview, Upcoming Trends and Top Company Analysis Forecast - 2031

Date: 21-08-2024, Publication: biospace.com, Journalist / Agency: , Edition: Internet, Supplement: test, Page No:

Summary:

BMW on Tuesday said it is recalling 720,796 vehicles in North America because they are equipped with an electric water pump that may short circuit as a result of faulty installation, posing a fire hazard. According to recall documents posted by the National Highway Traffic Safety Administration, "An improperly sealed electrical connector on the water pump may be exposed to water and short circuit." More specifically, "blowby-liquid from the positive crankcase ventilation system may collect on the intake air hose," and eventually "drip onto the plug connector," potentially seeping in, causing an electrical shortage. "This could increase the risk of a thermal event and, in rare cases, a fire," the recall states. The recall applies to the following BMW models: MAKE MODEL YEAR   BMW 228I 2014-2016 BMW 228XI 2014-2016 BMW 328I 2012-2016 BMW 328XI 2012-2016 BMW 428I 2014-2016 BMW 428XI 2015-2016 BMW 528I 2012-2016 BMW X1 2012-2015 BMW X3 2013-2017 BMW X4 2015-2018 BMW X5 2016-2018 BMW Z4 2012-2016 Dealers will replace the water pump and plug connector and install a protective shield, free of charge. Notification letters will be mailed to vehicle owners on October 4. Owners may contact BMW customer service at 1-800-525-7417. BMW's number for the recall is "24V-608." Owners can also contact NHTSA's safety hotline at 1-888-327-4236 (toll-free at 1-800-424-9153) or go to www.nhtsa.gov for further information.
